

St. John College of Engineering and Management

Autonomous Institute

(A Christian Religious Minority Institution)

Approved by AICTE and DTE, Affiliated to University of Mumbai / MSBTE

DTE Code : 3218 AICTE Permanent ID : 1-4790201

NAAC Accredited with Grade 'A+', Three Programs NBA Accredited

2025-26

Criterion IV

4.2.1. LIBRARY IS AUTOMATED USING INTEGRATED LIBRARY MANAGEMENT SYSTEM (ILMS)

- Integrated Library Management System (ILMS) Details**

Particular	Details
Name of ILMS	KOHA Integrated Library Management Software
Version	21.05.00.000
Year of Automation	2013
Nature of Automation	Fully Automated Integrated Library Management System (ILMS)

- Online Public Access Catalogue (OPAC)**

The Central Library provides an Online Public Access Catalogue (OPAC) facility, enabling users to search the library collection by title, author, subject, accession number, keyword, publisher, and other search parameters. The OPAC enhances accessibility and facilitates efficient retrieval of library resources.

25-26 Data

4.2 - Library as a Learning Resource

4.2.1 - Library is automated using Integrated Library management System (ILMS)

The St. John College of Engineering and Management library has a collection of **27287 volumes** and **5843 titles**. The library also subscribes to **94 national and international journals**, supporting the academic and research needs of students and faculty. In addition, the library provides access to various **e-resources, e-databases**, digital academic content, research papers, and reference materials, along with **Turnitin plagiarism detection** software with AI writing detection, enabling students, faculty, and researchers to explore scholarly resources, ensure the originality of research work, and uphold academic integrity (as of 31.03.2026). To ensure proper organization of library materials, the library uses **KOHA integrated library management software (ILMS)**, which is cloud-hosted on Microsoft Azure. KOHA is open-source software. One terminal is reserved for students to search for information regarding book availability and to issue books. The software is web-based and includes a **OPAC** (Online Public Access Catalog), providing a single-window interface where complete user information can be accessed such as circulation status, fine status, contact details, reading and circulation history, and more. **Various types of reports** can be generated using the software, which are useful for committee reviews and inspections from time to time. Both the book database and the user database are maintained within the system. The issue and return process is **automated**, although manual cards are still kept as supporting documents for students and faculty. The library has been fully automated since 2013.

Barcoding is implemented in the library: each book is barcoded, and all issue/return transactions are carried out using the barcode system.

The library spans a total area of 560.03 square meters, providing ample space for study and research. Designed to accommodate a large number of users, it offers a comfortable seating capacity for up to 210 individuals, making it an ideal environment for both individual learning and group activities.

Library Automation

1. Introduction

The library has been fully automated using the Koha Integrated Library Management System (ILMS). Koha is an open-source, web-based software widely used for efficient library operations. It enhances accessibility, transparency, and user satisfaction.

2. Objectives of Library Automation

- To digitize library resources and services
- To provide quick and easy access to library materials
- To reduce manual work and errors
- To enable online services such as OPAC (Online Public Access Catalog)
- To improve overall efficiency of library management

3. Features of Koha Implementation

The following modules of Koha are implemented:

a) Cataloguing

- Bibliographic records are created using MARC standards
- Easy search and retrieval of books

b) Circulation

- Issue, return, and renewal of books are automated
- Barcode-based transactions
- Fine calculation system

c) OPAC (Online Public Access Catalog)

- Users can search books online
- Students can log in to check: Issued books, Due dates, Reading history.
- Availability status is visible in real time
- Accessible within campus network.

d) Acquisition

- Vendor management and book ordering system
- Billing

e) Serial Control

- Management of journals, magazines, and periodicals

f) Reports

- Monthly usage reports
- Visitor statistics
- Book issue/return reports

Library Automation Facilities – Availability Status

Sr. No.	Component / Facility	Description	Status
1	Koha (Integrated Library Management System)	Used for cataloguing, circulation, OPAC, reports	Available
2	Digital Library Platform (Computerized Reading Area)	Computers and digital resources	Available
3	E-Books & E-Journals	EBSCO, DELNET, PROQUEST	Available
4	INFLIBNET Membership	Access to national academic resources	Not Available
5	DELNET Membership	Resource sharing facility	Available
6	Indian Chapter of American Concrete Institute (Lifetime Membership)	Access to civil engineering resources, technical publications, and research support.	Available
7	Institute of Electronic and Telecommunication Engineering IETE (Lifetime Membership)	Access to electronics & telecommunication journals, papers, and professional development resources.	Available
8	NDLI Access	Free digital academic content	Available
9	OPAC (Online Public Access Catalog) Special Computer Systems	Online book search system Systems for student access	Available
10	Barcode System	For issue/return and tracking	Available
11	RFID System	Advanced tracking and security	Not Available / Planned
12	Plagiarism Checking Facility	TURNITIN : iThenticate for PG 2.0 with AI Detection Supports research work and projects	Available
13	Internet / Wi-Fi Facility	Enables access to e-resources	Available
14	Institutional Repository	Digital access to previous year question papers	Available
15	Library Website / Portal	Access point for services	Available
16	CCTV Surveillance System	Security of books and infrastructure	Available
17	Data Backup System	Ensures data safety and recovery	Available

The library, automated with Koha ILMS, provides efficient access to books, e-resources, and digital repositories. OPAC, barcode systems, and online notifications ensure smooth operations, while memberships with DELNET, NDLI, ACI, and IETE give students and faculty access to specialized academic resources. Facilities like plagiarism checking, institutional repository, and computer-enabled reading areas support research and learning. Security and data backup systems maintain the safety and integrity of all resources, creating a reliable and modern library environment.

ST. JOHN COLLEGE OF ENGINEERING & MANAGEMENT DSpace 7 CENTRAL LIBRARY

DSpace is the world leading open source repository platform that enables organisations to:

- easily ingest documents, audio, video, datasets and their corresponding Dublin Core metadata
- open up this content to local and global audiences, thanks to the OAI-PMH interface and Google Scholar optimizations
- issue permanent urls and trustworthy identifiers, including optional integrations with handle.net and DataCite DOI

Join an international community of leading institutions using DSpace.
